Accomplishments

Scholarship given by USI based on the high school results	2016
Student regional chess champion for 3 years	2013-2015

Why out of the box

Having lived in Italy, Germany, and Switzerland, I learned to communicate with and to understand people of different cultures and backgrounds. Experiencing all of that in a wheelchair helped me see the world in a different point of view and consequently to adapt to different situations. I firmly think that understanding people and having a clear communication (that is not so easy as it can seem) is the key to have the best work performance and to improve yourself and others. From the chess game, I learned to deal with stress and I developed focus and problem-solving skills.
