Student regional chess champion for 3 years	2013-2015

Why out of the box

Having lived in Italy, Germany, and Switzerland, I learned to communicate with and to understand people of different cultures and backgrounds. Experiencing all of that in a wheelchair helped me seeing the world in a different point of view and consequently to adapt to different situations. I firmly think that understanding people and having a clear communication (that is not so easy as it can seem) is the key to have the best work performance and to improve yourself and others. From one of my best passion, chess game, I learned to deal with stress and I developed focus and problem-solving skills.
